IN THE CLAIMS

Please add new claims 62-77 as follows:

--62. A method enabling a music listener to receive audio or auxiliary information about a particular musical selection, the method comprising the steps of:

providing a database storing a plurality of musical selections, including auxiliary information relating to each selection;

receiving a request from user at a remote location to obtain audio or auxiliary information about one of the musical selections stored in the database; and

communicating the audio or auxiliary information to the user.

63. The method of claim 62, wherein the auxiliary information is name of the musical
